WORKSHOP

Skill Upgradation JOURNEY from Basic to Advance Technology

OUR VISION

- To contribute to workforce productivity, socioeconomic development and social harmony through well rounded and industry relevant training programs with employment at the heart of academic offerings, technology at the heart of operation and academic mobility as the focus deploying inclusive, distributed and low cost delivery methodology.
- Also to expand the supply of skilled and employable technician by increasing access to quality training programs and by strengthening the technical and education and vocational training system. One of our main aim being the spread of awareness amongst all trainees and industries and satisfy their information needs.

OUR MISSION

- As a centre for excellence in technical field, Shree Parantap Institute of CNC Programming aims to set up an Institute for production and manufacturing sector which offers a range of academic & career options for aspirants as a catalyst for the transformation. The focus of the Institute is to further the prospects of technology and entrepreneurship within the Industry.
- And to enable all individuals acquire skills and capabilities, prepare them to get appropriate employment and ensure their competitiveness in National and International work environment.

OUR METHODOLOGY

Serving Since 2000

- Our methodology of training is starting from basic to advance to skill up gradation level with practical training on course relevant machine. We provide training of CNC machines of almost all controllers, through theory as well as practical which covers CNC Operating, Programming & Setting as CNC technology is the latest technology in today's fast growing world. Apart from this, we also train our students how to measure critical components of different machine with different kinds of measurement instruments. At the end of course project work is done by trainee in which trainee got self-confidence of making component independently.
- The course curriculum for all the courses offered has been specially designed keeping in mind the industry needs, advances in technology and a very practical approach to the subject.
- Institute arrange industrial visit and on job training for the students to get the exact scenario of the industry & update their knowledge as per the latest technology.
- Other programs and co curriculum activities are conducted for all-round development of the student to imbibe in them good values, habits and skills which will improve their general behavior. Special training is given to students for enhancing their skills towards career development & developing interviewing skills.
- Thus, we can say "Industrial atmosphere is offered to the trainees during hands on phase by which trainee learn to survive in industry with the help of skills, knowledge, attitude, willingness etc."

Serving Since 2000

TRAINERS POLICY

- Institute is managed by a team of highly qualified & dedicated professionals to serve trainees all the time.
- We have a proper system to train our trainers & trainees with latest awareness in their fields. For further knowledge, we are frequently sending them to industrial exhibitions, workshops, international seminars & at other companies.
- Now a day's, Government focused more on “Mahila Sashaktikaran” wherein, female employment is encouraged. We would like to focus that we are encouraging Mahila Sashaktikaran by way of appointing female faculty in our Institution & giving her equal opportunity to stand straight in this technical field.

Serving Since 2000

PLACEMENT POLICY

- Institute have separate placement cell where trainees placement is carried out after course completion. Institute successfully counsels trainee & assures trainee placements. The number of PARANTAP trainees selected is higher when placed in various domestic & global companies.
- Regular workshops, group discussions, written tests, etc. are held to build teamwork & group learning and also focuses on the development of inter-personal communication skills of trainees, hands on experience on live jobs.
- Special training is given to trainees for developing interviewing skills, soft skills, team building & leadership skills, safety & health related measures are taught. Various reputed companies organize “Campus Interviews” to select competent trainee.
- More than 13 crore rupees have been spent for employment oriented skill training programmes.
- About 23,000 candidates have been trained.
